

Homeowner Responsibility for Water Supply Line

The water that enters your home comes from a tap off a main distribution pipe. In your yard, you will find a metal cap marked “WATER” (red dot). All piping between the main distribution pipe and the metal cap marked “WATER” is the responsibility of CU to repair and maintain (blue line). All piping between the metal “WATER” cap and the home is the responsibility of the homeowner to repair and maintain (yellow line). Figure 1 is a graphical depiction of CU and homeowner responsibility.
